

**STD-4B+ Horizontal\***  
- all models -

As an economical indoor solution, these traditional-style mailboxes have been the standard in centralized mail equipment for decades and are highly configurable in nature. While the standard finish for 4B+ equipment is a smooth anodized aluminum, these mailboxes may also be powder coated. This equipment may no longer be used for Postal Delivery in new construction but may continue to be used for replacement and private delivery purposes.

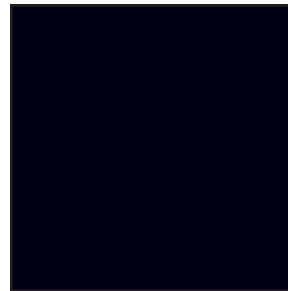

\*These product lines are intended for indoor installations only and due to postal regulations are available for replacement or private use only.
